Work experience

Front-end developer @Wealthcome

2022 - present

Bordeaux, France · Freelance, remote

Fintech specialising in financial account aggregation and wealth management. Developed client and advisor portals for individual investors, financial advisors and private banks.

- Developed the React, TypeScript and TailwindCSS web platform and the React Native application for iOS and Android.
- Implemented Figma designs and contributed to the V2 redesign with a design system of reusable, accessible components.
- Provided front-end technical leadership through pull request reviews and performance optimisation.
- Integrated complex financial data through GraphQL, working directly with the product team in Agile.

Webflow developer · UI/UX @Groupe Leong

2025

Paris, France · Freelance, remote

Designed and built the Palm Beach and IZIL Hotel websites to showcase their identity and support direct bookings.

- Independently designed Figma layouts and user journeys, then built responsive Webflow pages and animations.
- Set up a custom CMS so the client could manage and update content independently.
- Improved metadata, site structure and loading performance. Managed the project directly with the group.

Front-end developer · UI/UX @Septplaces

2024

Paris, France · Freelance, remote

A carpooling application in Senegal, designed for groups and large families.

- Designed Figma mockups and built the iOS and Android application using React Native, TypeScript and Tamagui.
- Implemented multi-stop journeys, adjustable waiting times and real-time trip tracking.

UI/UX designer @Kikotey

2023 - 2024

Paris, France · Freelance, remote

Designed a mobile carpooling application to help users connect.

- Created Figma mockups and prototypes designed for quick implementation.
- Rebuilt the application with React Native and NativeWind from these designs.

Work experience

Front-end developer @Roomchazer

2022

California, USA · Freelance, remote

A mobile application helping students in the United States find off-campus housing.

- Developed interfaces with React Native and StyleSheet, introducing TypeScript for a more robust codebase.
- Integrated and optimised GraphQL requests with the backend developer.

Front-end developer @Jumy

2021 - 2022

Dubai, UAE · Freelance, remote

Developed the interfaces of an NFT marketplace with React and TailwindCSS.

- Translated supplied designs into interfaces and wrote maintainable front-end code validated through reviews.
- Worked in Agile with daily stand-ups and Notion tickets alongside developers, the CEO and the CTO.

Education

42 Software Engineering School

Diploma awarded in 2025

Digital architecture · Paris, France

Wildcard

2021

Internship · Paris, France · Hybrid

- React and TailwindCSS dashboard built with Dashboard UI Kit 3.0.
- Internal React documentation for developer onboarding and a WordPress blog.

Capgemini

2019

Internship · Issy-les-Moulineaux, France

- JavaScript live preview tool for LVMH spirits brands.
- HTML, CSS and PHP interface connected to the Cypheme API for counterfeit detection.

Faculté des Sciences
